KASEYA 365 USER

Beyond the Endpoint... Prevent, Respond, and Recover from User Threats...

Kaseya 365 User goes beyond the endpoint to protect and preserve the critical data and identity of users. One simple, low-cost subscription to defend against attacks, detect and react to anomalies, and safeguard critical user data.

	<h3>PREVENT</h3> <p>Technology and training to prevent phishing attacks and the exposure of user credentials.</p>	<h3>RESPOND</h3> <p>Intelligent alerting and automatic responses to detect and block anomalies in SaaS activity.</p>	<h3>RECOVER</h3> <p>Comprehensive backup and streamlined recovery of SaaS data to protect your business.</p>
--	---	--	--

<h3>COMPREHENSIVE</h3> <p>Reduce vendor fatigue by putting all critical components in one easy to understand, acquire, and manage subscription.</p>	<h3>EFFICIENT</h3> <p>Experience massive improvements in technician efficiency by leveraging the power of workflow integrations and automations.</p>
<h3>AFFORDABLE</h3> <p>Experience significant budget benefits by saving up to a 75% when compared to using a mix of separate competing solutions.</p>	

WHY KASEYA 365?

As with the other members of the Kaseya 365 family, Kaseya 365 User aims to deliver everything essential to solve for user security - all in one place, in one unified and automated subscription. The combination of these components delivers a more unified and automated experience that radically boosts technician efficiency while saving you money...

With "the Essential 50" 365 Automations built in, Kaseya 365 components save time by making workflows smoother, reducing manual mistakes and making complicated tasks quicker & easier.

PREVENT	RESPOND	RECOVER	AUTOMATE
<ul style="list-style-type: none"> • Anti-Phishing • Security Awareness Training • Simulation & Testing • Dark Web Monitoring 	<ul style="list-style-type: none"> • SaaS Application Management • SaaS Event/ Anomaly Reporting • Automatic Account Locking 	<ul style="list-style-type: none"> • Automated & Continuous SaaS Data Backup • Instant, User-Specific Data Recovery 	

Maximize Efficiency with **Built-In Automations**

Building on the power of Kaseya 365 Endpoint, the entire IT Complete platform, and the centralized management of KaseyaONE, Kaseya 365 User further reduces manual tasks, boosts productivity and ensures robust security and data protection, optimizing your ability to protect the devices, users and data that drive any business.

With this subscription, the common core set of components and automations that made Kaseya 365 Endpoint so efficient is expanded to over 50 core automations, unleashing even more time savings, workflow efficiency, and opportunity for scale.

PREVENT

Graphus Anti-Phishing combines with the power of BullPhish ID to train and test user understanding of security practices. Meanwhile, DarkWeb ID scours the web to identify any exposure of user credentials.

RESPOND

SaaS-Alerts joins the IT Complete platform to intelligently monitor SaaS activity and secure user accounts.

RECOVER

Choose between Spanning and Datto SaaS Protection to efficiently protect and secure data in SaaS applications.

SAVE MORE | DO MORE

Every dollar saved is another freed to serve your businesses evolving IT needs.

On average, Kaseya 365 User will save **at least 65% in cost per user** when compared to separate market solutions. That means an incremental and instant 65% additional back to your bottom line on every user you cover, while ensuring both your business users and your technicians are more safe and efficient.

A SEAMLESS UPGRADE

We've created a simple upgrade path for our partners who already have components of Kaseya 365 User. This process ensures that we protect your existing investment, functionality and highest license count. You get all of Kaseya 365 User for a small upgrade fee, all included components, and a locked-in price for additional licenses to support your growth.

PRICED FOR PROFIT

Kaseya 365 User is offered at an unbelievable price that redefine the economics of user protection...
