Innovative Storage Solutions for Modern Hybrid-Cloud IT

Seagate® enterprise storage systems, when paired with the OSNexus QuantaStor storage platform, provides innovative storage with scale-out and scale-up architecture options to serve diverse workloads.

Choose from three available solutions to meet your needs.

1 High-Performance, All-Flash Solutions for Mission-Critical Workloads

Seagate + OSNexus scale-up all-flash integrated storage server solutions are ideal for mission-critical use cases, including databases, virtualization, VDI, transcoding, and media editing. These solutions are built on the Seagate Exos® AP 2U24 integrated storage and compute platform with dual-controllers for high availability.

Recommended Products
- Seagate Exos AP 2U24 All Flash Array
- OSNexus QuantaStor

Common Use Cases
- High-performance storage for server virtualization (VMware ESXi, Hyper-V, and XenServer)
- High-performance storage for VDI
- High-performance storage for database and OLTP storage
- High-performance storage for media editing and playback

2 Scale-Up Hybrid Storage Solutions with Seagate Exos CORVAULT

When combined with the OSNexus QuantaStor platform, Seagate's scale-up hybrid storage systems provide highly available file and block storage to meet demanding workloads that require cost-effective, high-density, and high-performance storage.

Recommended Products
- Seagate Exos AP 2U24 All Flash Array
- Seagate Exos CORVAULT 5U84
- OSNexus QuantaStor

Common Use Cases
- Disk-to-disk backup and archive (Veeam and Commvault)
- Higher education user home directories
- Big data storage for AI/ML, analytics, and IOT data
- High-density, general-purpose NAS servers
- CCTV video surveillance storage

3 Hyper-Scalable File & Object Storage Clusters with Seagate Exos CORVAULT

Seagate + OSNexus scale-out solutions offer comprehensive file and object storage supporting major protocols, including S3, NFS, and SMB across major OS platforms. These solutions also provide native direct file system access for HPC and other high-performance use cases.

Recommended Products

- Seagate Exos AP 2U24 All Flash Array
- 2 × Seagate Exos CORVAULT 5U84
- OSNexus QuantaStor

Common Use Cases

- Big data storage for AI/ML and analytics
- Large scale backup and archive
- Content delivery networks
- Multi-tenant object storage
- HPC/high-performance file and object storage

DISCOUNTS

The Seagate + OSNexus bundles offer exclusive pricing on systems, software, and services, with Seagate systems priced at the Diamond Tier level for all resellers—regardless of their Seagate partner tier status. An approved deal registration is required through Climb Channel Solutions. Terms and conditions apply. Contact Climb for more information. Pricing available for a limited time and valid in the United States only.

FEATURES/BENEFITS

- Simplify storage management with Storage Grid technology
- Unified file and block storage
- High performance
- Secure
- Unified 24×7 global support
- Ultra-high durability
- Advanced systems platform
